

Corinne McAuley – The nature of my art varies from time to time, but it always involves beads. I love beads, collect beads, I hoard beads and purchase many beads with no idea of how I will use them. The colors, the textures and how they come together, draws me in every time. Working in this unique medium has provided printed media attention through newspapers, domestic and international magazines. In addition, being a juried artist has brought honors to my work with awards from various shows. I have a strong belief in helping each other in our community. Doors open unexpectedly and have drawn me to organizations such as the Foundation for Blind Children. I
